EDUCATION

G.L. Bajaj Institute of Technology and Management, Greater Noida <i>Bachelor of Technology in Computer Science and Engineering (AIML)</i> Key Concepts: Data Structures and Algorithms, Object Oriented Programming, Database Management System, Operating System, System Design.	2022–2026 Expected CGPA: 8.61
Fertilizer Public School, Shahjahanpur <i>Intermediate</i>	2021–2022 Percentage: 93%

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS
Frameworks & Libraries: Node.js, Express.js, React.js
Database: MySQL, MongoDB
Tools & Platforms: VS Code, Git, GitHub, Postman

ACHIEVEMENTS

- Solved 1000+ coding problems on LeetCode with the **maximum contest rating of 1909 (Knight)**.
- Achieved a **global rank 836** out of 35,629 participants in LeetCode Weekly Contest 464.
- 4* coder at GFG with **maximum contest rating of 1825**.
- Secured a **global rank 180** in GFG Weekly Contest 193.
- 3* coder at CodeChef with a **maximum contest rating of 1715**.
- Secured a **global rank 78** in CodeChef Starters 199.
- Pupil at Codeforces with the **maximum contest rating of 1316**.

PROJECTS

MediAssist <i>Node.js, Express.js, React.js, JavaScript, MongoDB</i> (User View) (Admin View)	Aug 2025
- Developed a healthcare platform connecting 15+ doctors across 5+ specialities (scalable as more join), enabling users to easily filter and discover relevant doctors. - Implemented real-time slot updates with toast notifications, managing 10+ daily bookings and reducing manual coordination/waiting time by 40%. - Integrated secure online payments, successfully handling dozens of test transactions with instant success/failure notifications to ensure reliability. - Built an admin panel to manage doctors, appointments, and payments, streamlining operations and cutting appointment management effort from 15+ mins to under 5 mins.	
Roamify <i>Node.js, Express.js, JavaScript, MongoDB, Bootstrap, EJS</i> (Live Link)	June 2025
- Developed a fully responsive property booking web app, leveraging EJS templating and Bootstrap to deliver a seamless user experience across devices, tested with 50+ listings. - Designed CRUD operations for property listings using Express.js and MongoDB, enabling dynamic data management with 100 ms average query latency. - Added Mapbox-based geolocation features, tested across 10+ cities, achieving high-precision property mapping with <50m average accuracy.	
CareShare <i>Node.js, Express.js, JavaScript, MongoDB, EJS</i> (Live Link)	Nov 2024 – Jan 2025
- Engineered a full-stack food donation platform to connect donors with recipients, reducing community-level food wastage and enabling real-time donation tracking. - Engineered backend services using Node.js and Express.js, creating RESTful APIs for secure and scalable user, donation, and transaction management. - Integrated MongoDB for structured storage of donation data, user profiles, and live transaction logs, achieving <200ms average query latency.
